

Confetti Caterpillar

An EarthParty™ Character

EarthParty Move The Confetti Wiggle

1. Walk forward

Walk forward
like a happy
caterpillar!

2. Wiggle your body
side to side

Wiggle your body
side to side
and feel the beat!

3. Throw your hands
in the air

Throw your hands
in the air and
celebrate everywhere!

Play The Caterpillar Song while you do this move!

Sing Along with Confetti Caterpillars!

Caterpillar Caterpillar

(The Caterpillar Song)

In a forest • filled with life
A caterpillar lived • who tried and tried
So very slow • on the leaf and the vine
Tiny little legs • always behind

Caterpillar Caterpillar • why are you slow
Caterpillar caterpillar • go go go
Caterpillar caterpillar • your doing fine
Caterpillar caterpillar • it takes time

Some bugs laughed • others snickered and played
Our caterpillar friend • felt tired today
Why can't I fly • why can't I run
But the caterpillars journey • had just begun

Caterpillar Caterpillar • why are you slow
Caterpillar caterpillar • go go go
Caterpillar caterpillar • your doing fine
Caterpillar caterpillar • it takes time

Morning approached • so cozy in bed
Caterpillar said • I'll just sleep in instead
But when he woke up • he could see
That when he grew wings • it wasn't a dream
He flew high • away from the crowd
Some of them wished • they were caterpillars now

Caterpillar Caterpillar • why are you slow
Caterpillar caterpillar • go go go
Caterpillar caterpillar • your doing fine
Caterpillar caterpillar • it takes time

Caterpillar Facts

1. Caterpillars are the larvae of butterflies and moths.

They have soft bodies with many **segments** and tiny legs.

2. Caterpillars love to eat! They **munch** on leaves to grow big and strong.

3. They have tiny hairs called **setae** that help them feel and explore.

4. Caterpillars grow quickly and **shed their skin** several times as they get bigger.

5. When they're ready, they form a **chrysalis** or **cocoon** to begin their change.

6. Inside the **chrysalis** or **cocoon**, they **transform** into beautiful butterflies or moths!

7. Caterpillars use **silk** to spin cocoons or create a safe place to rest.

8. They come in many colors and patterns to **blend in** and stay safe.

9. Caterpillars are an **important** part of nature and help our world grow!
